

Name & Position		
Charles Twort Parent Governor Sub-Committees: Pupils & Curriculum		
Who am I?	Why am I here?	What impact have I had in the last 12 months?
I am a Chartered Engineering (CEng) and Fellow of the Institution of Mechanical Engineers (IMechE). I work for a global train manufacturing company as a Head of Engineering, I also hold several posts on railway related industry boards. I have two children at the school, Abigail and Sophie and live in the village (Burton-on-the-Wolds). I have a keen interest in travel and the outdoor environment.	I am passionate about comprehensive and inclusive education, believing that schooling is not just about academic achievement, but also the development of the social and interpersonal skills that allow our children to grow and contribute, in their own unique ways, to our society. I myself had to overcome my own barrier to learning, having been diagnosed with dyslexia late in my formal education, thus having an insight to the real value of an rounded education that supports all levels of academic ability through individual learning. A key aspect to my professional role is the leadership and development of the next generation of engineers, which I wish to instil with the same passion for science and technology as I have. Thus as a parent governor, I believe I can adapt and apply the professional skills, knowledge and experience that I have, to support the school in its current activities, while working with all stakeholders to help the school to achieve and maintain an 'Outstanding' education for all pupils in a safe and supportive environment.	New Governor – started March 2016
